ISA Transactions 41 (2002) 543–545

# Cumulative contents of Volume 41

## Volume 41, Number 1, January 2002

1 **Message from the Editor**
R. Russell Rhinehart

3 **Ball stud inspection system using machine vision**
Dongik Shin, Changsoo Han, Young Shik Moon

13 **Lensed optical fiber sensors for on-line measurement of flow**
Sallehuddin Ibrahim, Robert Garnett Green, Ken Dutton, Ruzairi Abdul Rahim

19 **Development of a GPC-based sliding mode controller**
Mercedes Pérez de la Parte, Oscar Camacho, Eduardo F. Camacho

31 **Optimal solution, quantitative performance estimation, and robust tuning of the simplifying controller**
Weidong Zhang, Xiaoming Xu

37 **An effective frequency domain approach to tuning non-PID controllers for high performance**
Qing-Guo Wang, He Ru, Xiao-Gang Huang

51 **Autotuning positive feedback time delay controller for dead time processes**
K. M. Tsang, A. Besharati Rad, W. L. Chan

57 **Multivariable control of grinding plants: A comparative simulation study**
Manuel Duarte, Alejandro Castillo, Florencio Sepúlveda, Angel Contreras, Patricio Giménez, Luis Castelli

81 **Self-optimizing MPC of melt temperature in injection moulding**
R. Dubay

95 **An integration architecture for the automation of a continuous production complex**
Edgar Chacón, Isabel Besembel, Flor Narciso, Jonás Montilva, Eliezer Colina

115 **Selecting human machine interface package in integrating a process automation system**
Kianoosh Ravaie, Alireza Haji-Valizadeh

## Volume 41, Number 2, April 2002

127 **Software sensor for on-line estimation of the microbial activity in activated sludge systems**
Oscar A. Z. Sotomayor, Song Won Park, Claudio Garcia

145 **High frequency testing of rubber mounts**
Nader Vahdati, L. Ken Lauderbaugh Saunders

155 **Detection of abrupt change and applications in sensor decalibration monitoring**
Ashish Malhotra, Biao Huang

**167 A statistically based filter**
R. Russell Rhinehart

**177 From linear to nonlinear control means: A practical progression**
Zhiqiang Gao

**191 Robustness of discrete-time state feedback control systems**
Sri Kolla, David Border

**195 Grouped-neural network modeling for model predictive control**
Jing Ou, R. Russell Rhinehart

**203 Experimental investigation of subspace identification and LQ control of a pressure tank**
Qiang Xiong, Aiping Jiang, Arthur Jutan

**215 A study of control strategy for the bin system with tube mill in the coal fired power station**
Jianhong Lu, Laijiu Chen, Jong Shen, Yiqian Wu, Fenghua Lu

**225 Identification and robust control of an experimental servo motor**
E. J. Adam, E. D. Guestrin

**235 A fuzzy-logic antiswing controller for three-dimensional overhead cranes**
Sung-Kun Cho, Ho-Hoon Lee

**245 Batch control system project for a pharmaceutical plant**
Roman Holý, Jaroslav Poživil

**255 An intelligent system for multivariate statistical process monitoring and diagnosis**
Eric Tatara, Ali Çinar

Volume 41, Number 3, July 2002

**273 Acoustic emission data assisted process monitoring**
Gary G. Yen, Haiming Lu

**283 Sensor fusion by pseudo information measure: A mobile robot application**
Mohammad Reza Asharif, Behzad Moshiri, Reza HoseinNezhad

**303 Visually enhanced CCTV digital surveillance utilizing Intranet and Internet**
Nobuyuki Ozaki

**317 $H_\infty$ PID controller design for runaway processes with time delay**
Weidong Zhang, Xiaoming Xu

**323 Design and implementation of a gain scheduling controller for a water level control system**
Miao Wang, Francesco Crusca

**333 A new two-degree-of-freedom level control scheme**
Weidong Zhang, Xiaoming Xu, Yugeng Xi

**343 Improving the development of event-driven control systems in the batch processing industry. A case study**
A. Sanchez, G. Rotstein, N. Alsop, J. P. Bromberg, C. Gollain, S. Sorensen, S. Macchietto, C. Jakeman

**365 Fault diagnosis and accommodation of a three-tank system based on analytical redundancy**
Didier Theilliol, Hassan Noura, Jean-Christophe Ponsart

**383 Alarm system optimization for increasing operations productivity**
Yoshitaka Yuki

## Volume 41, Number 4, October 2002

389 **Editorial viewpoint. A P&ID standard: What, why, how?**
Frederick A. Meier

395 **Fuzzy-neuro LVQ and its comparison with fuzzy algorithm LVQ in artificial odor discrimination system**
Benyamin Kusumoputro, Hary Budiarto, Wisnu Jatmiko

409 **On-line identification and optimization of feed rate profiles for high productivity fed-batch culture of hybridoma cells using genetic algorithms**
Lei Zhi Chen, Sing Kiong Nguang, Xiao Dong Chen

421 **A distributed simulation technique for multiple input multiple output systems**
Amitava Gupta, Chandan Mazumdar, D. Patranobis

437 **Fuzzy control of multivariable process by modified error decoupling**
Saravanan S, Shubhalaxmi Kher

445 **Fusion of qualitative bond graph and genetic algorithms: A fault diagnosis application**
C. H. Lo, Y. K. Wong, A. B. Rad, K. M. Chow

457 **Design of PID-type controllers using multiobjective genetic algorithms**
Alberto Herreros, Enrique Baeyens, José R. Perán

473 **New tuning method for PID controller**
Jing-Chung Shen

485 **Supervisory control design based on hybrid systems and fuzzy events detection. Application to an oxichlorination reactor**
Edmary Altamiranda, Horacio Torres, Eliezer Colina, Edgar Chacón

501 **Model predictive control helps to regulate slow processes—robust barrel temperature control**
Tien L. Chia

511 **Design PID controllers for desired time-domain or frequency-domain response**
Weidong Zhang, Yugeng Xi, Genke Yang, Xiaoming Xu

521 **Controller performance analysis with LQG benchmark obtained under closed loop conditions**
Ramesh Kadali, Biao Huang

539 **Author index to Volume 41**

543 **Cumulative contents of Volume 41**
